Fluence & Assurewize

Fluence life in association with ASSUREWIZE is leading the way in Compliance and Sterilization Solutions in healthcare, offering cutting-edge technologies and services designed to revolutionize sterilization processes and ensure regulatory adherence. Built upon a patented framework, AssureWize strives to achieve the highest standards in compliance, sterilization, and operational efficiency. At the core of AssureWize is AssureHub, a powerful, unified platform that manages complex workflows across multiple healthcare facilities. With multi-facility capabilities, AssureHub allows healthcare groups to centralize oversight, optimize asset usage, and ensure consistent compliance across all locations.

Our Solutions

AssureWize empowers healthcare providers to optimize CSSD operations, ensure regulatory compliance, and streamline multi-facility management through a unified, user-friendly platform. Our Solution sets new benchmarks in compliance and sterilization integrating with all sterilizers, incubators, washers, hydriums, other equipment and facility systems/processes.

Comprehensive Multi-Facility Dashboard

Sterilwize consolidates operations from multiple facilities into a single virtual dashboard. It allows real-time monitoring of sterilization, inventory, and compliance across locations.

CSSD Workflow Automation

Sterilwize automates the entire CSSD workflow, optimizing sterilization and decontamination processes for maximum efficiency. It tracks each phase to ensure regulatory compliance and consistent quality.

Equipment Integration, Monitoring & Maintenance Across Brands

Sterilwize monitors sterilization and CSSD equipment in real-time, alerting teams to any deviations. It ensures peak equipment performance and reduces downtime through proactive maintenance management.

Inventory Management

Sterilwize offers real-time inventory tracking for instruments and supplies, optimizing stock levels and preventing shortages. It supports rapid responses to surgical needs, enhancing operational efficiency.

Complete Traceability & Instruments Tracking

Sterilwize tracks the full lifecycle of medical instruments from cleaning to storage. This ensures complete traceability and reduces risks related to instrument handling.

Compliance Management

Sterilwize ensures complete compliance in the CSSD process by managing each sterilization stage to meet regulatory standards. It minimizes errors and ensures continuous adherence to protocols.

IPAC Resource & Training Hub

Digitally maintain all CSSD and infection control related documents and execute training programs.

Data Analytics and Reporting Tools

Sterilwize provides analytics tools to track sterilization cycles, instrument usage, and turnaround times. These insights help identify bottlenecks and drive improvements in productivity.

Services & Programs

CSSD Management, Design & Setup

AssureWize streamlines sterilization processes, cutting costs while ensuring safety. Our design services optimize CSSDs for efficiency, space, and compliance.

Quality Assurance & Compliance

Our tools and regular audits help CSSDs meet rigorous industry standards (AAMI, ISO), ensuring the highest levels of safety.

Preventive Maintenance Programs

We offer preventive maintenance tailored to CSSD needs to ensure minimal downtime and optimal performance of sterilization equipment.

Standard Operating Procedures (SOPs) Development

Tailored SOPs ensure standardized, high-quality practices across all shifts, covering every aspect of the sterilization cycle.

Consulting & Accreditations

We provide expert guidance in regulatory compliance, CSSD operations, and healthcare accreditation.

Training & Certification Programs

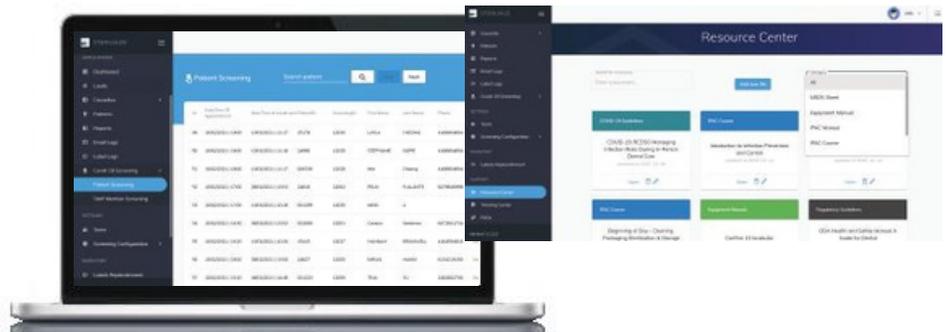

AssureWize provides comprehensive training and certification courses to keep CSSD staff updated on best practices.

Lean Process Improvement

Using Lean principles, AssureWize eliminates waste, streamlines workflows, and boosts productivity in CSSDs.

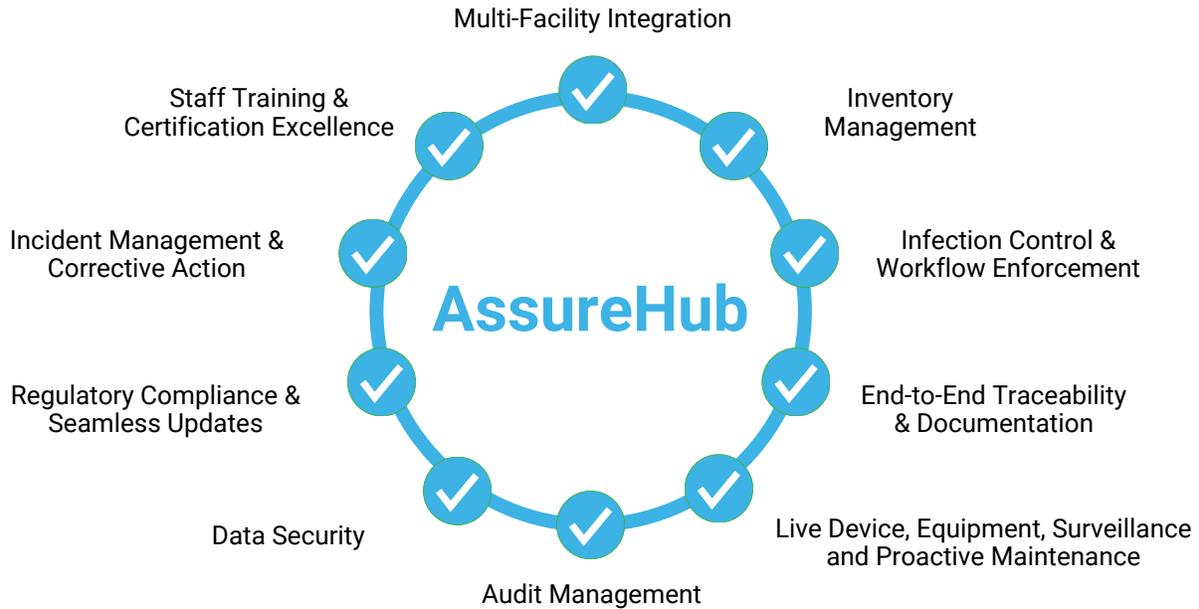

Guidance on Sterilization Equipment & Supplies

We offer expert advice on selecting the most suitable sterilization equipment and supplies, optimizing processes and cost-efficiency.

Centralized Compliance & Sterilization Hub Across Facilities

At the heart of ASSUREWIZE lies AssureHub, a dynamic centralized dashboard connecting multiple facilities, driving exceptional compliance and workflow management efficiency. With the ability to manage regional or national operations, AssureHub ensures unwavering adherence to CSSD standards across every location. Uniting your entire network standardizes processes, fosters best practice sharing, and maintains consistent compliance monitoring. Its seamless integration with sterilization equipment enhances Instrument tracking and sterilization monitoring, boosting equipment uptime and ensuring continuous regulatory compliance.
